

## **Corn Cob Blasting**

The look and feel of natural wood is very desirable. When it's time to re-finish the wood, home owners are faced with hours and hours of sanding or chemical stripping.

Corn Cob Media should be the preferred way strip a log cabin house for the following reasons:

- The logs do not have to be PH neutralized after blasting, as is the case with Soda.
- Corn is a natural product and will not damage plants or grass.
- Corn is worker and environmentally friendly.

## **Nut Shell**

Nut Shells is one of the newest media's available on the market today. Shell is today's media for yesterdays Corn Cob media.

The price of corn cob has almost tripled, due to the simple rules of economics "Supply and Demand". Our countries search for alternative fuel has led to a higher demand of corn cob. There by prompting a cost increase.

Shell is ideal for blasting wood, metal, concrete and stone because it is less abrasive, biodegradable, non-toxic, environmentally safe, and of course cost effective media. Shell also leaves a minimal amount of dust.

Be sure to check with your local and state EPA websites for credits for using Eco Friendly media blasting product.
